HICE – currently largest body of FIDIC knowledge

By Arnis Zelcs on July, 2026

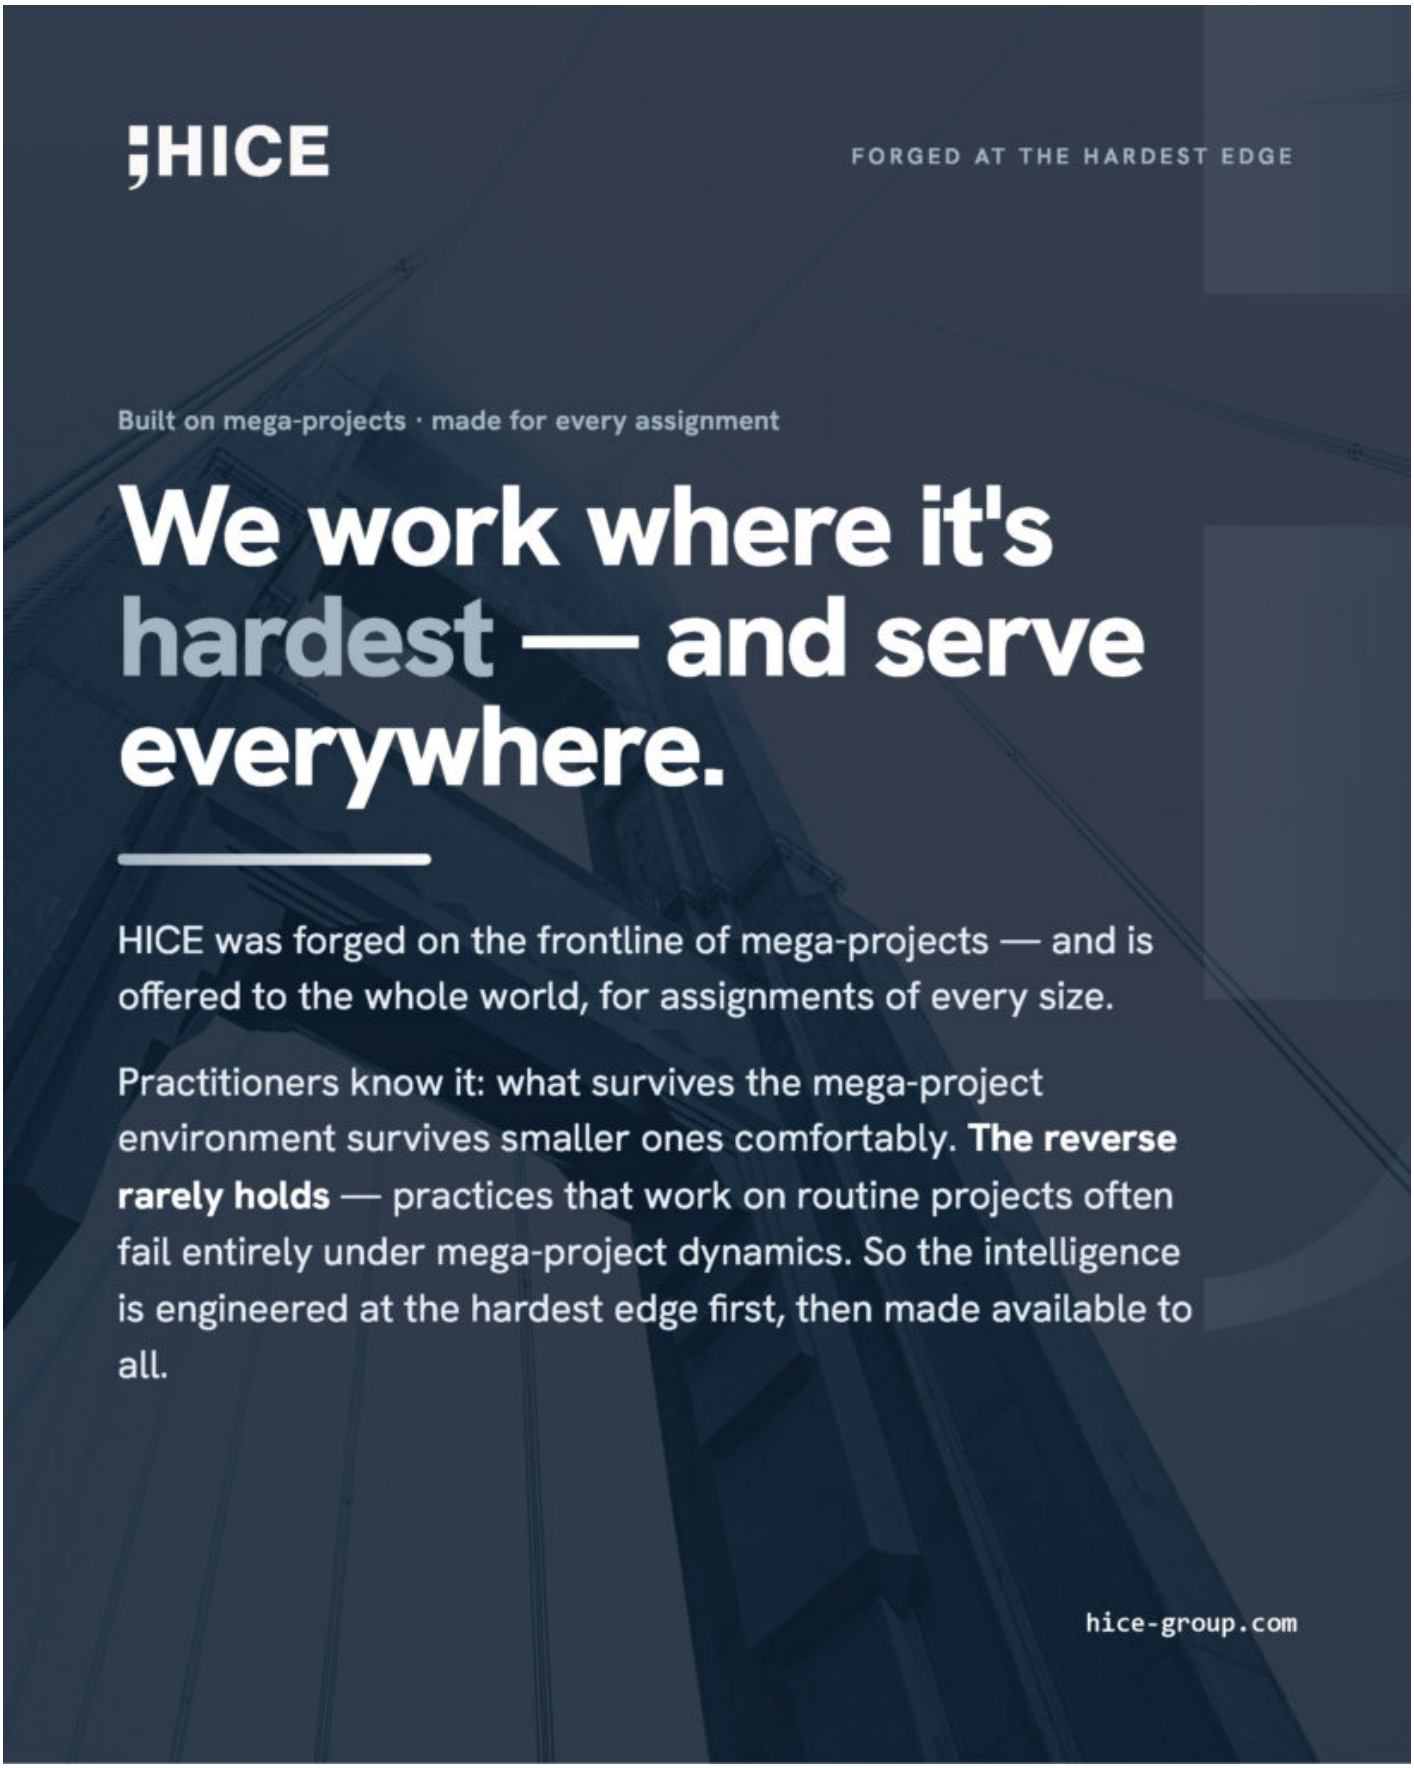

Today HICE is the world’s largest library of contracts management systems and templates; and particularly FIDIC templates.

HICE systems are live on two living megaprojects:
– world’s largest railway electrification programme – design and build;
– massive urban development programme in Northern Europe, where we cover all running FIDIC contracts;
and in collaboration with Egis group on certain projects in Europe.

Currently we cover scope of all major FIDIC family contracts – Green Book, White Book, Red Book, Yellow Book, Silver Book, Gold Book. Soon we will launch NEC section. Then – HICE will look forward to partner with Anthropic to enhance contracts management discipline on global scale.

HICE methodology is built from more than 15 years of practical experience across infrastructure, procurement, commercial management, legal advisory and 16+ billion-euro project delivery environments.
